

2024 CHD ECHO PROGRAM

PARTNERING CONGENITAL HEART DEFECT (CHD) EXPERTS WITH MEDICAL PROVIDERS

Participate in monthly clinical learning discussions based on CHD curriculum and focused on the clinical management of patients with CHDs.

The first CHD ECHO program forming partnerships between CHD experts and primary providers to help detect, diagnose, and create a continuity of care for CHD patients.

All medical providers including pediatricians, hospitalists, ER physicians, nurse practitioners, physician assistants, and specialized providers who want to learn more about CHDs are invited.

HOW IT WORKS

The CHD ECHO program will help create mentorships and provide support to the medical community and the families they serve.

Each session will include a brief didactic presentation followed by a CHD patient case study with an interactive best practice care discussion and will offer a whole-person approach to CHD-related care.
